PROFILE

Hands-on Lead UX/UI Designer with **13+ years of experience** leading UX strategy and delivering web and mobile products across **digital commerce**, enterprise, healthcare, life sciences, and SaaS. I design customer journeys end to end, from **search, product listing (PLP) and product detail pages (PDP) to cart, checkout, account, and campaign landing pages**, with a focus on conversion, accessibility, and measurable outcomes. My foundation is manual design craft: user research, user flows, wireframes, pixel-precise responsive UI, and **scalable design systems** built in Figma. Currently at **GSPANN**, I work with **US-based** product, marketing, and engineering stakeholders on global brand programmes, and use an **AI-first workflow** (Claude, Claude Design, Figma Make, Lovable) to move faster from insight to validated prototype.

SUMMARY

- **Ecommerce UX leadership:** lead UX strategy and hands-on design for commerce journeys: search, PLP, PDP, cart, checkout, account, and campaign landing pages.
- **Conversion-focused design:** identify usability issues through analytics, heuristic reviews, and testing; shape CRO hypotheses, A/B test variants, and data-informed UX improvements.
- **Personalised, cross-channel journeys:** connect web experiences with email, push notifications, and lifecycle marketing touchpoints in partnership with marketing teams.
- **Mobile-first & accessible:** responsive, mobile-first UI that follows WCAG accessibility standards and usability best practices.
- **Design systems:** foundations, design tokens, reusable components with variants, and consistent interaction patterns in Figma, documented with engineering in Storybook.
- **Flows & prototyping:** user flows, journey maps, and information architecture in Figma and FigJam; interactive prototypes for stakeholder reviews and usability testing.
- **AI-integrated workflow & vibe coding:** Claude for research synthesis and user stories; Claude Design, Figma Make, and Lovable for rapid concepts and working prototypes, with generated HTML, CSS, and React reviewed against the design system.
- **Stakeholder & delivery leadership:** present UX recommendations and design rationale to US-based stakeholders; Scrum Master experience running sprints, reviews, and retrospectives.

TECHNICAL SKILLS

Product & UI Design	Figma (advanced prototyping, components & variants, Auto Layout, Dev Mode, annotations), FigJam, responsive and mobile-first design, interaction design, high-fidelity UI, micro-interactions
Ecommerce & CRO	Search, PLP, PDP, cart, checkout and account journeys, campaign landing pages, Shopify commerce journeys, conversion rate optimisation, A/B testing and experimentation, analytics-informed design
Personalisation & Lifecycle	Cross-channel journeys across web, email, and push; lifecycle marketing touchpoints; Braze-style customer engagement flows; OneSignal push notifications
Design Systems	Design system architecture, foundations and design tokens, component libraries, interaction patterns, usage guidelines, Storybook documentation, Zeplin
UX Research & Flows	User research, VOC analysis, personas, user flows, journey mapping, information architecture, usability testing, heuristic evaluation, WCAG accessibility, competitor and market research
AI Design & Prototyping	Claude.ai, Claude Design, Figma Make, Lovable, prompt engineering, AI-assisted research synthesis, AI rapid prototyping, GenAI product UX
Process & Collaboration	Scrum (Scrum Master), Agile sprints, ClickUp, Jira, Azure DevOps, Miro; collaboration with US-based product, ecommerce, marketing, and engineering teams

Front-End	HTML5, CSS3, SCSS, responsive web design, Bootstrap, Material UI, React, React theming, Webflow, HubSpot CMS, cross-browser and device testing
Tools & Analytics	Google Analytics, GTmetrix, Adobe Photoshop, Illustrator, Git, VS Code

DESIGN PROCESS

Hands-on design at every stage, measured against business outcomes, with AI used to move faster.

STAGE	HANDS-ON DESIGN	AI-ASSISTED & DATA
01 Discover	Stakeholder workshops, user interviews, VOC and analytics review, competitor audits of commerce journeys	Claude synthesises findings into themes, personas, and conversion opportunities
02 Define	User flows, journey maps, information architecture, cross-channel journey mapping in FigJam	Claude drafts user stories, acceptance criteria, and test hypotheses
03 Design	Mobile-first wireframes and pixel-precise UI in Figma on the design system	Claude Design and Figma Make for rapid concept and variant exploration
04 Validate	Usability testing, heuristic reviews, WCAG accessibility checks, A/B test variants	Working prototypes in Lovable and Figma for faster testing
05 Deliver	Annotated specs, Dev Mode handoff, design QA, post-launch measurement	Components documented in Storybook; results feed the next iteration

WORK EXPERIENCE

GSPANN Technologies — March 13, 2026 – Present

Lead UX/UI Designer

- Lead UX strategy and hands-on design for digital commerce and marketing experiences for global enterprise brands, working daily with US-based product, ecommerce, marketing, and engineering stakeholders.
- Audit customer journeys across search, PLP, PDP, cart, checkout, and account to find usability issues and conversion drop-offs, and turn them into prioritised, data-informed design improvements.
- Create user flows, wireframes, interactive prototypes, and responsive, mobile-first UI in Figma and FigJam, from first sketch to developer-ready specs.
- Define CRO hypotheses and design A/B test variants with product and analytics teams, tracking results against conversion and engagement goals.
- Develop and maintain scalable design systems, reusable components, and consistent interaction patterns shared across brands and channels.
- Apply WCAG accessibility standards and present UX recommendations and design rationale to client stakeholders; support engineering through handoff, design QA, and implementation.

Project: Danaher · Digital commerce & customer web experience

- Designed customer-facing web journeys for product discovery, search, product listing and detail pages, and account experiences across Danaher operating-company sites.
- Built and extended shared design-system components and patterns so multiple brand sites stay consistent, accessible, and faster to build.
- Ran heuristic reviews and usability findings sessions, and translated them into prioritised UX improvements with product owners.

Project: Leica · Product, ecommerce & campaign experiences

- Redesigned product discovery and detail experiences for complex, specification-heavy products, simplifying comparison, filtering, and the path to quote, cart, and checkout.
- Designed responsive campaign and product landing pages with marketing teams, aligned to the brand design system and mobile-first guidelines.
- Prepared annotated Figma specs and worked with engineering through implementation and design QA.

Project: ContentHub GPT · GenAI content platform

- Led end-to-end UX for an AI-powered content hub that helps marketing teams generate, review, and manage brand content with GPT-based assistance.

- Designed prompt input, content generation, review and approval, and asset management flows, with clear states for AI output, editing, and version history.
- Used Claude, Figma Make, and Lovable to prototype and validate interaction concepts quickly before high-fidelity design and handoff.

Cayzen Technologies **August 2019 – March 7, 2026**

Senior AI-Driven Product Designer · Scrum Master

- Led product discovery, stakeholder workshops, and UX strategy, turning business goals and research insights into clear design requirements.
- Designed end-to-end user flows, wireframes, and high-fidelity UI by hand in Figma for web and mobile products, from first sketch to final pixel.
- Built the design system from the ground up: colour, typography, and spacing tokens, components with variants, and usage guidelines, mirrored in Storybook with engineering.
- Introduced an AI-first design workflow with Claude.ai, Claude Design, Figma Make, and Lovable for research synthesis, personas, UX copy, user stories, and rapid prototypes, shortening the path from idea to validated prototype.
- Served as Scrum Master for the product squad: facilitated sprint planning, stand-ups, reviews, and retrospectives, and set up ClickUp workflows and dashboards for transparent delivery.
- Partnered with product managers and engineers on usability and performance, and contributed front-end code in HTML5, CSS3, SCSS, and React.

Meditab **September 2017 – July 2019**

Senior UI/UX Designer & Web Designer

- Designed and developed responsive web applications and healthcare product interfaces.
- Led UX from requirements analysis through user flows, wireframes, and prototypes to final delivery.
- Created UI assets for iOS, iPad, and Android applications.
- Wrote standards-compliant code with a focus on accessibility, SEO, and W3C validation.
- Conducted performance and usability testing, and managed analytics, cookie compliance, and client coordination.

Matrix Comsec **March 2015 – August 2017**

Senior UI/UX Designer

- Designed and developed responsive web applications and enterprise dashboards.
- Created UI/UX for desktop and mobile applications, from wireframes to interactive prototypes.
- Worked with backend teams to ensure seamless front-end integration.

Concept Securities Pvt. Ltd. **June 2013 – February 2015**

Web & Graphic Designer

- Designed web applications, landing pages, and brand materials for corporate clients.
- Optimised graphics and layouts, and built dynamic web content with HTML and CSS.
- Collaborated with marketing and development teams on implementation and testing.

EDUCATION

B.Tech in Computer Engineering · CHARUSAT University · CGPA 8.5 2013

H.S.C. (Science) · GHSEB · 86% 2009

S.S.C. · GSEB · 84.92% 2007

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge and belief. Thank you for your time and consideration.
